

>> IN THE NAME OF ALLAH, THE MOST GRACIOUS, THE MOST MERCIFUL <<

FRAGILITY ANALYSIS BASED ON ACCELERATION AND STRUCTURAL DUCTILITY DAMAGE INDEX WITH INCREMENTAL DYNAMIC ANALYSIS (IDA) OF A SINGLE-DEGREE-OF-FREEDOM (SDOF) SYSTEM UTILIZING 100 GROUND MOTIONS IN OPENSEES (PARALLEL COMPUTING VERSION)

WRITTEN BY SALAR DELAVAR GHASHGHAEI (QASHQAI)

$$\text{Structural Ductility Damage Index} = \frac{\Delta_d - \Delta_y}{\Delta_u - \Delta_y}$$

Δ_d = Lateral Displacement from Dynamic Analysis

Δ_y = Lateral Yield Displacement from Pushover Analysis

Δ_u = Lateral Ultimate Displacement from Pushover Analysis

Spyder (Python 3.12)

1 #####  
2 # >> IN THE NAME OF ALLAH, THE MOST GRACIOUS, THE MOST MERCIFUL <<  
3 # FRAGILITY ANALYSIS BASED ON ACCELERATION AND STRUCTURAL DUCTILITY DAMAGE INDEX WITH  
4 # INCREMENTAL DYNAMIC ANALYSIS (IDA) OF A SINGLE-DEGREE-OF-FREEDOM (SDOF) SYSTEM  
5 # UTILIZING 100 GROUND MOTIONS IN OPENSEES  
6 #  
7 # PARALLEL COMPUTING VERSION  
8 #  
9 # This program performs Incremental Dynamic Analysis (IDA) on a Single-Degree-of-Freedom (SDOF) system  
10 # subjected to 100 seismic ground motions. The analysis evaluates the structural response under varying  
11 # levels of seismic intensity.  
12 # The framework is designed to support researchers and engineers in assessing the probabilistic seismic  
13 # performance of structures, with a focus on understanding the impact of uncertainty on structural  
14 # response and design.  
15 #  
16 # Key Features:  
17 # - Simulation of SDOF system using OpenSees.  
18 # - Incremental scaling of ground motions for IDA.  
19 # - Probabilistic fragility assessment based on predefined damage states.  
20 # - Visualization of structural response and fragility curves.  
21 # - Export of results for further analysis.  
22 #  
23 # PARALLEL PROCESSING MEANS RUNNING SEVERAL TASKS AT THE SAME TIME INSTEAD OF ONE AFTER ANOTHER.  
24 # IN THE CODE, EACH STEP ANALYSIS WAS CALCULATED IN SEQUENCE,  
25 # SO THE CPU WORKED ON ONLY ONE MODE AT ANY MOMENT. IN THE REWRITTEN VERSION, THE JOBLIB LIBRARY ALLOWS  
26 # ALL FOUR MODES TO RUN SIMULTANEOUSLY ON DIFFERENT CPU CORES. EACH CORE PROCESSES ONE MODE INDEPENDENTLY,  
27 # SO THE TOTAL COMPUTATION TIME BECOMES MUCH SHORTER.  
28 #  
29 # MODERN COMPUTERS USUALLY HAVE MULTIPLE CORES, FOR EXAMPLE 4, 8, OR EVEN MORE. WHEN WE USE PARALLEL  
30 # PROCESSING, WE DIVIDE THE WORKLOAD ACROSS THESE CORES. BECAUSE EACH MODE IS A SEPARATE AND INDEPENDENT  
31 # ANALYSIS, THEY ARE PERFECT FOR PARALLEL EXECUTION. INSTEAD OF WAITING FOR MODE 1 TO FINISH BEFORE  
32 # STARTING MODE 2, ALL MODES START TOGETHER AND FINISH ALMOST TOGETHER.  
33 #  
34 # IN PRACTICE, THE SPEED IMPROVEMENT DEPENDS ON HOW MANY CORES YOUR CPU HAS. IF YOUR COMPUTER HAS 4 CORES,
